J55 Chip Seal, from P14 to US HWY 169: The department has obtained a work in the ROW permit from the IDOT for the work at the J55 & US HWY 169

intersection. Upon completion of culvert replacement. Elder Corporation will be on site to complete the base stabilization portion of the project. Currently Elder could be on site as early as this week to begin work or early next week.

The department is still awaiting the final mitigation credit quote for the Union 13 project. Upon receipt of the final quote the department will work to procure the required mitigation credits for the project. The department completed the check plans for the project. Check plans were submitted to the IDOT for review and comment. The department is targeting a November IDOT letting.

Last week at the Middle Fork 10 site, the crew finished kicking and bracing the wing forms, extend the screed rail out on the wings, built working platforms and each end of the bridge, placed pencil rod in the backwall and abutment haunch forms, patched any holes that could potentially leak, did final pre-pour walk around. Dormark was on site Monday and finished tying reinforcing steel. Deck pour is planned for Wednesday July 22nd. This week it is planned to pour the bridge superstructure and maintain continual hydration through Friday.

The department finished preparing the concept statement for the Washington 24 bridge project. The concept statement has been reviewed and cleared by the IDOT. Due to some problems opening attachments this project was re-sent to the Location and Environment bureau.

Cultural Resources staff at the IDOT requested a cultural resources evaluation be completed by the University of Iowa for the project. Alan reached out for some additional information about the project. He also indicated that the CRE should be completed next week.
